

Your Solution for Online Payment Transactions

Orion Payment Systems and Monetary Science Solution (ms²) have developed a new payment program designed to process transactions quickly and efficiently from your computer - bypassing the traditional "credit card machine" method.

StarCharge Lite is a Windows-based payment software created to process transactions over the internet in a secure, real-time environment. Using ms² "speed of light solutions", StarCharge Lite offers flexible, multi-payment transaction processing.

The numerous benefits of StarCharge Lite include:

- Eliminating the need for PCI compliance.
- Accommodates retail and MOTO
- Streamlines operations - reduce re-keying of transactional data
- Qualify for the best rates available
- Easy to install, easy to use.

Characteristics

- Certified by major networks: Global Payments
- Multi-merchant environment
- Extensive reporting capabilities
- Internet and dial-up connectivity
- Stand alone or networkable
- Credit and check cards
- Single or multiple users
- Import/export transactional data
- Sub 2 second transaction response time
- Secure, encrypted environment
- Works with most application software
- Operates in single transaction or batch mode
- Offline store and forward capabilities
- Supported hardware: report printers, mag card readers and printers
- Ease of use: use your computer instead of a credit card machine
- Customer support - 24/7/365

System Requirements

- PC with Microsoft Windows XP
- 256 MB (minimum) of RAM
- 8 Mg of hard drive space recommended
- High speed internet connection (cable, DSL, T-1)
- .NET framework 1.1

Your Solution for Online Payment Transactions

You may need to install additional enhancements to your operating system depending on your payment processing company, connection type, and operating system.

Transaction Screen

- Transaction data input fields are on the left and a view of user transaction information is on the right.
- Industry type and transaction type required data fields are enabled or disabled.
- Data input fields include
 - Clerk or Shift ID #
 - Ticket/Invoice #
 - Account #
 - CVV, CVC, CID
 - Card Security
 - Type of Purchase
 - Cardholder Name
 - Address
 - Amount

Settlement Screen

Track the life cycle of a transaction, from inception to settlement, including returns and credits.

- Verify settlement of transactions
- Settlement history up to 60 days
- Reports include:
 - Settlement History
 - Transaction Reports
 - Card Detail
 - Transaction History

Settings Screen

Customize your StarCharge Lite by choosing:

- Role: charge from a location of your choice
- Merchant: type of transaction (MOTO, e-commerce, etc.) and market type (retail store, etc.)
- Application: Type of receipt (ticket #, etc.), automatic numbering, change authorized amount.
